

INNOVATIVE PLASTICS INC.
NEW PERSPECTIVES IN SIGN MATERIALS

Restriction of Hazardous Substances (RoHS) U.L. Certification/Halogenated Materials

Innovative Plastics Inc. (IPI) has investigated the Restriction of Hazardous Substances (RoHS) directive issued by the European Union (directive 2002/95/EC), through our on-line research.

This RoHS directive prohibits the distribution of products after July 1, 2006, which contain the following materials; lead, mercury, cadmium, hexavalent chromium, poly-brominated biphenyls and poly-brominated diphenyl ethers. The directive appears to apply to all products that operate on electrical power and contain electronic components.

IPI complies with the use and disclosure of all halogenated materials and does not incorporate poly-brominated biphenyls or poly-brominated diphenyl ethers in any of its products.

Based on our internal audit, IPI plastic sheet products would be in compliance with this directive and do not contain any of the elements noted above.

Our related MSDS documents may be found in the IPI website (<http://www.inoplas.com>) and can be referenced for further information.
