Statement on EU's REACH - SVHC (SVHC-223) and RoHS Directives

This statement reflects a common understanding of plastics manufacturing as it pertains to the EU Regulation EC No 1907/2006 of the European Parliament and of the Council of December 18, 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). It outlines the various obligations applicable to manufacturers and the requirements regarding their materials.

Specifically, EU REACH requires us:

- To inform recipients if a material placed on the European market contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight. SVHCs are identified on the European Chemical Agency (ECHA) website.
- To notify ECHA if a material contains an SVHC in excess of 0.1% by weight and the total amount of the SVHC present in all materials produced or imported to the European market that exceed one metric ton per year.
- To cease shipment of materials containing EU REACH Annex XIV substances subject to authorization unless authorization has been obtained; and to cease shipments of materials containing EU REACH Annex XVII substances when restrictions apply. Innovative Plastics, having evaluated supplier certifications, material compositions, manufacturing facilities and global affiliates, to the best of our knowledge and belief, determine that:
- Innovative Plastics materials do not contain the substances within the 223 entries currently on the SVHC candidate list in excess of 0.1% by weight per product as published by ECHA with latest publication date of January 2022.
- Innovative Plastics materials do not contain any of the substances above the maximum limits under the given application in Annex XVII of the EU REACH regulation.
- In addition to compliance with the EU's REACH and SVHC, Innovative Plastics materials are also in compliance with the European Union's RoHS 3 directive, which prohibits the following materials: lead, mercury, cadmium, hexavalent chromium, poly-brominated biphenyls and poly-brominated diphenyl ethers.
